What do ya know?current report: **Default Report**

Displaying 14 of 16 respondents

Response Type: Normal Response**Collector:** What do ya know? (Web Link)**Custom Value:** empty**IP Address:** 76.252.79.97**Response Started:** Tue, May 19, 2009 4:01:14 PM**Response Modified:** Tue, May 19, 2009 4:09:51 PM**1. Name:**

Jazzy Boyd

2. What was your favorite thing you did in GET City this year and why?

Making a psa because I learned about the environment and stuff and what we can do better. And I got to work with my friends.

3. Give 3 examples of renewable energy sources.

Wind, solar and biogas

4. Which of the following is the cleanest source of energy? (Choose 1)

solar

5. A friend of yours does not know what the difference is between a renewable energy source and one that is not renewable. What will you tell her so that she understands.

I will tell her that a non renewable source causes global warming is bad for hte environment and you can't reuse it over and over. When we use it all up we won't have anymore.

6. A friend of yours heard that the Obama administration is going to create thousands of green jobs. Your friend does not know what a green job is. What will you tell him? Make sure to give an example of a green job also.

I will tell him green jobs are jobs are good for the environment which is like GO GREEN! and an example is like when you build solar panels.

7. Biomass does not release carbon dioxide or particulate pollution (smog) when burned

False

8. Burning coal to generate electricity (you can choose more than one)

releases carbon dioxide into the atmosphere

causes particulate pollution (smog)

accounts for most of Lansing's energy production

contributes to climate change (global warming)

9. A friend of yours thinks that Lansing should use wind energy as the main source of energy to create electricity in Lansing. Do

you think this is a good idea? Why or why not?

No I don't think it is a good idea in Lansing we don't have enough wind power so we couldn't turn the turbines to make energy, only on the windy days.

10. Obama recently gave a speech saying we needed to use more alternative energy sources to help stop global warming. Your family members are not sure why alternative energy sources will help stop global warming. What will you tell them about this?

I will tell them that it stops global warming because climate change heats up our earth and that causes animals to die and lose their homes. ALternative energy sources help stop global warming because they are renewable and they are good for the environment because they don't release CO2 or pollution. CO2 causes global warming
